

Note: it is advisable to turn off the tap after each wash to isolate the washing machine from the water supply.

For the washing machine to function properly the terminal end of the discharge hose (mouth) must be at a minimum of 50 cm and a maximum of 85 cm from the ground.

Electricity supply and safety advice

Washing machines are supplied to operate at a voltage of 230-240V, 50 Hz single-phase. Check that the conductor is powerful enough to supply at least 3.0 kW, then connect the plug to a 10A earthed socket.

After installation, the appliance must be positioned so that the plug is accessible.

Check that the electricity supply to your home has an earthing system.

The socket in your home and the plug on the appliance must be of the same type.

WARNING: Do not use this appliance with a cord extension set, multiple connector or electrical portable outlet device due to risk of overload, splashing or ingress of moisture.

All washing machines comply with the safety requirements laid down by the Quality Trademark Institute.

ATTENTION:

if the power supply cord or plug of this appliance is damaged, it must be replaced by an authorised service centre or qualified electrician.

The manufacturer declines all responsibility in the event of any printing mistakes in this booklet. The manufacturer also reserves the right to make appropriate modifications to its products without changing the essential characteristics.

This appliance is marked according to the European directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). WEEE contains both polluting substances (which can cause negative consequences for the environment) and basic components (which can be re-used). It is important to have WEEE subjected to specific treatments, in order to remove and dispose properly all pollutants, and recover and recycle all materials. Individuals can play an important role in ensuring that WEEE does not become an environmental issue; it is essential to follow some basic rules:

- WEEE should not be treated as household waste;
- WEEE should be handed over to the relevant collection points managed by the municipality or by registered companies. In many countries, for large WEEE, home collection could be present.

In many countries, when you buy a new appliance, the old one may be returned to the retailer who has to collect it free of charge on a one-to-one basis, as long as the equipment is of equivalent type and has the same functions as the supplied equipment.
